

OMACH Evaluation Poem

Once upon a time
There was a Warsaw guy
his mind was made up one day
and the OMACH project came on its way

We started our mornings on Energizers
because we are not proper early risers
For lunch we were full of hunger
but no dessert at Jack's was harder.

We got Pączki's along the way
For a good working day

George learned some new words as well – Och Teatr and Muzeum Nazdrowie

NO GEORGE – NARODOWE!

For interviews we got prepared, since we listened to each other's cares

LipDub was a piece of cake, since Marcin showed us how to make

Daniel helped us with the startups
But we still need to find our problems
Warsaw wasn't one of them
So we put it all in a meme

The hotel had some problems
Only minor, just with toilets
At least we were spared the Polish noises
But sad without their forces

Countries became closer
As did names, faces and secret lovers <3
'Plener' became a second home
So we wrote everything in poem

This is all that we are saying
We're just waiting for the wedding
Till then active we shall stay
And get hired right away
